

Ellen Potter, M.A. -- Energy Catalyst

Providing services that support the blossoming of the heart mind, body, and spirit

Spiritual astrology provides practical information that supports each individual's journey throughout their lifetime. It supports the mind-body-spirit connection and brings a clear understanding of unconscious needs, desires, emotions and motivations. Spiritual astrology clarifies areas of growth, learning, integration, and one's mission for this lifetime. It is a powerful transformational tool wherever one is on their path.

Natal Charts

The basis of all astrological services is a confidential natal consultation. Here, the chart is interpreted as a whole, incorporating the influences of the planets and their aspects throughout the twelve houses. This is the road map upon which other services are based. Each consultation may focus on general or specific issues.

Solar Return Charts

All of us have a solar return on our birthday. This chart has value at any time during the year, and summarizes important themes, directions, and opportunities.

Synastry Charts (for Relationships)

This information is beneficial for individuals interested in maximizing their relationship, as it objectively summarizes communication styles, individual preferences (such as a need for 'alone' time), parenting styles, and much more. Also includes sources of greatest rewards and potential conflict, possible past-life connections, and relationship goals.

Transit & Progression Charts

The heavens are always changing and continuously presenting us with new life developments. Optimum benefits occur when we work with the energy, rather than resist or deny it. Recognizing transits and progressions assists with focusing and perspective, maximizing opportunities, understanding the unique timetable of one's life, integration, and more.

Astrology Reports Available

Email your birth data to ellenpotter1ATverizon.net and receive your complete birth report. Several reports are offered:

- 📖 Child Star Children's Birth Record
